Activity	<p><u>START SOTF Team 6 Activity:</u></p> <p>SOTF#6 Hugh Murrell (START), Tetra Tech Team Lead Dave Richardson , and Amber McDougle, from AECOM and Kenny our boat captain performed poling at 61 locations within focus area 9.45 – 10.80. A total of 25 locations had an overall submerged oil category of none, 23 locations had a category of light, 5 had a heavy category, and 8 locations had a category of moderate.</p> <p>Our team was tasked with mainly re polling locations that earlier this year had recorded sediment temperatures that were too cold to have a true reading taken. Today's activities went well. The weather was great with sunny skies and approximately 75 degrees. Only two areas were inaccessible for either our boat or our waders. If the sediment was deemed too thick, we did not access the area in just our waders.</p> <p>The reported moderate locations will be marked for later assessment by the Tetra Tech crews.</p>			

Health and Safety Issues	None
